About Sons and Summer Jobs

My son Magnus is home from RPI in Troy, New York; for his summer vacation and as he has done for the last three years, he has joined me at the Firm that I work for in NYC. He has been assisting the IT Director in setting up and maintaining our networks between multiple offices.

Aside from having his own office (with a door), unlike his old man; he has successfully raised his salary for each of the 4 years that he has worked with us, again, unlike his old man. He now, makes more than I do and he is spending it like it was water... or whatever that might mean.

This summers tasks have been greater than any of his past roles, as he has risen to a whole new status in the Department. He actually has developed "tenure". Aside from the Director, he has more years under his belt, than the 6 other staff below him... and he's summer help??? Go Figure!!!

To make a long story short, he has tackled the "Spam Control" of our incoming eMail systems. The software that he has chosen, is being "trained" to recognize SPAM by several methods but one of these is the "word recognition" and the ciphering of pornographic phrases and images.

After the Spam Filter captures an image or eMail, he must initially monitor the "capture" to allow it to pass... if it is legitimate... or to dispose of the item if it is not. Yesterday, I received an eMail from the construction site in Bequia St. Vincent and the Grenadines, which had been written by our "English-trained" Architect, who unwittingly used the phrase. "Roof Erection" continues on schedule, referring to the following photograph. This of course triggered the filter and led to my son's embarrassment at forwarding it on to my eMail folder... clearly marked, "Spam-Pornographic Content"
